EXAMINER

HOLMAN, JOHN D

ART UNIT

PAPER NUMBER

3643

DATE MAILED: 08/18/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/500,705	Applicant(s) VAN DYK ET AL.	
	Examiner John D. Holman	Art Unit 3643	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 May 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 55-64 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 55-64 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 55-64 are rejected under 35 U.S.C. 102(b) as being anticipated by Watson (US 5765923).

Regarding claim 55, Watson discloses an apparatus comprising a first cartridge (25) having a base (27) and a sidewall, a propellant (30) inside the enclosure, a first pressure wave deforming means (29) comprising a junction between the side wall of the first cartridge (25) and the base (27) of the first cartridge, and a second pressure wave deforming means (24) comprising at least one member disposed inside the first cartridge (25) and away from the base (27). See figure 3.

Regarding claim 56, Watson discloses an apparatus wherein the first cartridge (5) is shaped to direct a wave of pressure towards a periphery of the base. See figure 1 and column 2, line 50-56.

Regarding claim 57, Watson discloses an apparatus comprising a charge (30) disposed inside the first cartridge (5). See figure 1 and column 1, line 59-63.

Regarding claim 58, Watson discloses an apparatus wherein the first cartridge (25) is made from a plastically deformable material. See column 12, line 54-60.

Regarding claim 59, Watson discloses an apparatus wherein the second pressure wave deforming means (24) is made from a material having greater density than the density of the propellant. See column 4, line 67 and column 5, line 1.

Regarding claim 60, Watson discloses an apparatus wherein the member that is made from a material that has a density greater than the density of the propellant is turned into a high pressure jet. See column 9, line 65-67.

Regarding claim 61, Watson discloses an apparatus where in an explosive which acts directly on the member that is made from a material which has a density greater than the density of the propellant is used to generate a high pressure jet of the material. See column 9, line 65-67.

Regarding claim 62, Watson discloses an apparatus comprising an explosive (30) and a control unit, which initiates the propellant at a first predetermined time and detonates the explosive at a second predetermined time. See figure 1 and column 2, lines 43-56.

Regarding claim 63, Watson discloses an apparatus comprising a first and second initiators for initiating the propellant at a respective first and second point within the first cartridge. See column 2, line 50-56.

Regarding claim 64, Watson discloses an apparatus comprising a first cartridge (25), a first propellant (30), a second cartridge (34), a second propellant (39), a first pressure wave deforming means (29), a second pressure wave deforming means (24), wherein the first cartridge (25) includes a first initiator (39), wherein the second cartridge (34) includes a second initiator (35), and wherein the first and second cartridges are

positioned in an assembly with the first (39) and the second (35) initiators disposed at opposed remote points in the assembly. See figure 3.

Response to Arguments

Applicant's arguments filed 5/31/2006 have been fully considered but they are not persuasive. Regarding the two pressure wave deforming means, Watson discloses one pressure wave deforming means that comprises a junction between the side walls and the base of the cartridge and another that is disposed inside the cartridge located at the opposite end of the cartridge.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John D. Holman whose telephone number is 571 272-2754. The examiner can normally be reached on Monday through Friday 9am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Poon can be reached on 571 272-6891. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
